Around The Clock Peace of Mind For Your Mac

With built-in detection for over 200 issues, MacSOS Lifeguard employs direct, preemptive action to resolve problems **before** data loss or unplanned downtime.

MacSOS Lifeguard is a service of MacSOS

Your Personal Mac Lifesaver!
Since 1997

Proactive Support For Your Mac

MacSOS Lifeguard sends an alert when your Mac develops common, but critical issues such as failing hard drives, stale back-ups, malware, freezes and crashes, decreased battery life, and much, much, more.

Just as a real lifeguard supervises the health and safety of swimmers, MacSOS Lifeguard supervises the health and safety of your Mac, anticipating and inspecting for any problems **before** they get out of hand.

Privacy Is Paramount!

MacSOS Lifeguard is a health monitor, not a listening device

Read-only client ensures system privacy

Cannot track screen or keyboard activity

No identifying or location data reported

Cannot inspect browser history, or other similar user actions

OBSERVE

MacSOS Lifeguard: Peace Of Mind For Your Mac

Don't wait until your Mac won't turn on to realize you need a new hard drive.

Have the peace of mind knowing that MacSOS Lifeguard will notify me of an issue even before **you** know it's an issue.

Sample of what is observed:

- ✓ RAM Health
- ✓ Failing RAIDS
- ✓ Demographics
- ✓ Crashplan App
- ✓ Backblaze App
- ✓ Malware Infections
- ✓ Network Connectivity
- ✓ Time Machine Backups
- ✓ Hard Drive Capacity And Health
- ✓ Application Expiration Notification
- ✓ Laptop Battery Capacity And Health
- ✓ And Much, Much More...

MacSOS Lifeguard is the only software of its type for the Mac.

PREVENT

While a lifeguard protects your kids at the beach, MacSOS Lifeguard protects the photos of your kids at the beach!

MacSOS Lifeguard proactively oversees and guards the safety, security, and stability of your Mac(s), detecting any threats or issues it discovers on them.

Macs in homes and small offices rarely have well-staffed IT departments looking after them. However, with the MacSOS Lifeguard agent, decades of combined knowledge from the Apple IT industries finest consultants are distilled into a series of targeted tests designed to detect the earliest indications that trouble is brewing.

MacSOS Lifeguard performs checks hourly when your Mac is awake. These checks don't require any interaction, and they don't interrupt your work. While these checks are taking place in the background, you will not see any performance impact.

MacSOS Lifeguard is a service of MacSOS

RESCUE

When MacSOS Lifeguard discovers a problem, I receive an alert immediately.* There's no better way to catch issues and fix them before they cause data loss and system failure.

*Upon notification of an issue with your Mac, I will contact you during normal business hours to schedule a service call.

MacSOS Lifeguard costs less than \$2.50 a week. Install it today. Sleep soundly tonight!

*Pricing

Billed yearly on an auto recurring plan, MacSOS Lifeguard is priced to be simple, convenient, and cost effective!

Macs	Cost per year
1-3	\$125 ea.
4 +**	\$75 ea.

*Pricing for MacSOS Lifeguard covers **only** the annual cost of the observation and appraisal of your Mac(s).

Onsite visits to resolve issues due to MacSOS Lifeguard notifications will incur normal residential or business rate.

** Discount is applied to residential customers only
